▲ Colour Dose

Colour dose based on addition
to 25-32 MPa grey concrete

(1) 1 x 10 kg bag per cubic metre

(2) 2 x 10 kg bag per cubic metre

* SLATE = 1 x 9 kg bag per cubic metre

The colours depicted in this brochure are based on the oxide being added to grey concrete and the surface being sealed. They are intended as a guide only. As the ingredients within the products are derived from natural sources, colours may vary from batch to batch. Variations in colour and shading may also occur depending on the job conditions, chosen texture and finishing practices employed by your concrete contractor. For projects where the colour is critical, it is recommended that you obtain a concrete sample from your concrete supplier or contractor.
